DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 10, 12-17, and 21, drawn to an isolated polynucleotide comprising specific sequences and variants thereof, recombinant expression cassette and a host cell, classified in class 536, subclass 23.6, for example.
 - II. Claims 7-9, 11, 18-20 and 22, drawn to a method of transforming a plant and transgenic plant, classified in class 800, subclass 279, for example.

For each of inventions I-II above, restriction to one of the following is also required under 35 USC 121. Therefore, election is required of one of inventions I-II and one of inventions (A)-(C).

(A). SEQ ID NO: 5

(B). SEQ ID NO: 10

(C). SEQ ID NO: 22

The inventions I-II or (A)-(C) are distinct, each from the other because of the following reasons:

Inventions (A)-(C) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions represent structurally different polynucleotides. Also, different sequences have different level of effects. In addition, since each

Art Unit: 1638

polynucleotide is disclosed in specific SEQ ID NO., the structural difference between the polynucleotides has not been shown to be obvious.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the isolated polynucleotide of Group I can be used either in a materially different process than the plant transformation method of Group II, such as in a hybridization assay.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classifications, and the literature search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
